

# SPSS Training Packages

Organisations who wish to benefit from cost-effective, low administration, SPSS training can take advantage of one of our Training Packages.

## Course Vouchers

Course vouchers are designed to be used for public training courses and are good for organisations who know staff need training in a particular area but are currently unable to specify a date when they can attend.

- A voucher allows one person to attend a specified scheduled course.
- Any member of staff can use the voucher at any time within 12 months from the date of purchase.
- Useful to spend outstanding budgets and attend a course at a later date

## Corporate Card

The Corporate Card is designed for public training courses and like course vouchers are good for organisations who have a number of users requiring training at difference levels but are unable to commit to a particular date at the current time or unsure of who will be attending the training.

- A Corporate Card can be purchased for a specified number of course days, 10 days being the minimum, each day allows one person to attend one day of training at a scheduled course
- Any member of staff can use the Corporate Card at any time within 12 months from the date of purchase
- One purchase transaction can cover many courses
- Ease of administration, just quote the Corporate Card number on the booking form
- A graduating discount can be received of between 12.5% for a purchase of 10 days up to a maximum of 20% for a purchase of at 16 days or more.

## Six Day Card

The Six Day Card is designed for public training. It is good for an individual who would like to attend multiple courses.

- An individual can choose 6 days of training in any combination of courses
- Six Day Cards are valid for 12 months from the date of purchase
- You receive a 10% discount on standard public training costs.

## Pre-Paid Education Days

Pre-paid education days work in the same way as the Corporate Card, but can only be used for on-site/private training, and they are valid for a specified time period after the purchase date. If you have any budget for SPSS training but aren't able to commit your staff to dates or specific courses, then this approach ensures that your budget has been allocated to your training needs at a discount of between 10-20%.
