

WEB BASED TRAINING: SPSS INTERMEDIATE TOPICS

SPSS

■ Level: Intermediate ■ Duration: 9 hours On-Demand

TARGET AUDIENCE

This course is a natural follow-on to the SPSS The Basics Web Based Training, and for anyone who wishes to become more competent with the full range of data manipulation options and generally increase their efficiency with SPSS.

PREREQUISITES

Anyone who has previously attended an Introduction to SPSS course or SPSS The Basics Web Based Training, or has a sound working knowledge of SPSS and familiar with all aspects covered on the above mentioned courses.

OVERVIEW

The SPSS Intermediate Topics course focuses on ways to automate your work, manipulate data files and results, and send your output to other Windows applications. You will learn how to merge data sets and use Chartlooks to customize the look of your graphs.

COURSE CONTENT

- Choices in Running SPSS
- Advanced Data Modifications
- Advanced File Manipulation
- Add Variables and Data Aggregation
- Advanced Pivot Table Editing
- Moving Results from SPSS to Other Software
- Chartlooks and Templates
