

Private Training Programme

Could your organisation benefit from training delivered by an SPSS Consultant exclusively for you and your colleagues?

Why learn from manuals or send your entire department away for upwards of 2 days at a time when an SPSS Private Training programme can provide a complete tailor made solution.

- A training needs audit for your department/organisation
- Learning material created specifically for you
- The option to hire SPSS training rooms
- An experienced SPSS Consultant focusing purely on your organisations business problems for the duration of the programme

Every year we provide private data analysis training for hundreds of organisations throughout the UK. From schools to merchant banks, high street retailers to charities, SPSS have successfully provided organisations with the skills they require to face the challenges of interrogating and reporting on the myriad of data sources available to them.

SPSS private training courses differ to public classes as they can be built around a particular business goal or requirement unique to your organisation.

An experienced SPSS project manager will sit alongside key decision makers within your organisation to devise a curriculum that matches the challenges facing your company, to the particular capabilities and benefits that predictive analysis can provide. Such curricular range from introductory level courses to more sophisticated techniques. Classes can be built on either:

- Generic data
- Data that is particular to the vertical industry you operate in
- An extract of your own database

There are unlimited benefits from having training delivered by an SPSS consultant exclusively for you and your colleagues. If you have a team of data analysts that require expert guidance or have just a few people that would benefit from additional analytical training, then give SPSS Private Training a go.

Call SPSS now on 01483 719203 to discuss your requirements.
